PHCS Network and Limited Benefit Plans

Imagine Driving More Savings Through Your Limited Benefit Plan

Today more than ever, health plans with limited benefits are an ideal solution for consumers responsible for most or all of their healthcare costs. With the PHCS Network, Members have access to thousands of hospitals, practitioners and ancillary facilities who have agreed to significant discounts on their medical services.

Significant Access and Savings

With the PHCS Network, Members can choose from over 4,200 hospitals, 68,000 ancillary care facilities and 590,000 healthcare professionals nationwide, whether they seek care in their home town or across the country.

With discounts averaging 42% for physicians and specialists — the types of services most typically used with these plans — Members get more value for their benefit dollars.

With our March 2010 acquisition of Viant, we expect access and discounts to improve as we integrate providers from Beech Street and Texas True Choice into the PHCS Network. The PHCS Network is designed to be used only with limited benefit plans that offer a higher level of coverage.

The PHCS Network (as of April 2011)

The table below represents the number of providers in the PHCS Network as of April 2011. Please note that practitioners are counted only once as a primary care physician and once as a specialist (if applicable) in each state in which s/he practices. 'Unique Totals' represent provider headcount, disregarding multiple locations.
